

## **Guidelines for Classification of Food Products in Relation to “Maximum Residue Limits of Pesticides in Foodstuffs”**

### **Objective:**

These Guidelines are issued with the aim of assisting the sector in abiding by Administrative Regulation No. 11/2020 “Maximum Residue Limits of Pesticides in Foodstuffs”, which was amended by Administrative Regulation No. 2/2023. They offer the classification and technical information of relevant foodstuffs to facilitate compliance with relevant regulations.

### **Scope of Application:**

Foodstuffs regulated in Administrative Regulation No. 11/2020 “Maximum Residue Limits of Pesticides in Foodstuffs” amended by Administrative Regulation No. 2/2023.

### **Definitions:**

Code No.: the number given by the Codex Alimentarius Commission to each foodstuff in its food and feed classification system.

Food portion to which the maximum residue limit, or MRL, applies, and which is analysed: the portion of a foodstuff used to test for pesticide residues.

### **Reference:**

These Guidelines are compiled with reference to the documents concerning food and feed classification released by the Codex Alimentarius Commission.

For Macao’s current standards of maximum residue limits of pesticides and extraneous maximum residue limits of pesticides, please refer to Administrative Regulation No. 2/2023 and Administrative Regulation No. 11/2020. In addition, the following [link](https://www.iam.gov.mo/foodsafety/file?p=foodsafetyinfo/imgnews/638131145213604.pdf) (Portuguese version only) shows the electronic versions of their Table 1 “List of Maximum Residue Limits of Pesticides in Foodstuffs” and Table 2 “List of Extraneous Maximum Residue Limits of Pesticides in Foodstuffs”:

## Food Classification:

### I. Group of Bulb vegetables

1. Food portion to which the MRL applies, and which is analysed:
  - Bulb onions: whole commodity after removal of roots, adhering soil and any parchment-like skins that are easily detached.
  - Green onions: whole vegetable after removal of roots and adhering soil.
2. This group is divided into the following subgroups:
  - Subgroup A: bulb onions
  - Subgroup B: green onions

### 3. Detailed classification:

## II. Group of Brassica vegetables (except Brassica leafy vegetables)

- Food portion to which the MRL applies, and which is analysed:
  - Cabbage and kohlrabi: whole commodity as marketed, after removal of obviously rotten or withered leaves.
  - Cauliflower and broccoli: flower heads (immature inflorescences only).
  - Brussels sprouts: “buttons” only.
- This group is divided into the following subgroups:
  - Subgroup A: flowerhead brassicas
  - Subgroup B: head brassicas
  - Subgroup C: stem brassicas
- Detailed classification:

| Code No.                                | Common name in Chinese | Common name in English                                          | Scientific name/Explanation                                                         |

## VII. Group of Pulses

1. Food portion to which the MRL applies, and which is analysed:

- Whole commodity.

2. This group is divided into the following subgroups:

- Subgroup A: Dry beans
- Subgroup B: Dry peas
- Subgroup C: Dry underground pulses

3. Detailed classification:

| Code No.                     | Common name in Chinese | Common name in English               | Scientific name/Explanation                                |

### VIII Group of Root and tuber vegetables

1. Food portion to which the MRL applies, and which is analysed:
  - Whole commodity after removal of tops and adhering soil (e.g., by rinsing in running water or by gentle brushing of the dry commodity).
2. This group is divided into the following subgroups:
  - Subgroup A: Root vegetables
  - Subgroup B: Tuberous and corm vegetables
  - Subgroup C: Aquatic root and tuber vegetables
3. Detailed classification:

## XI. Group of Citrus Fruit

1. Food portion to which the MRL applies, and which is analysed:

- Whole commodity.

2. This group is divided into the following subgroups:

- Subgroup A: Lemons and Limes
- Subgroup B: Mandarins
- Subgroup C: Oranges, Sweet, Sour
- Subgroup D: Pummelo and Grapefruits

3. Detailed classification:

| Code No.                            | Common name in Chinese | Common name in English                                 | Scientific name/Explanation                                                                                                                                                                                                                                                                                                                          |

#### XV. Group of Assorted tropical and sub-tropical fruits - edible peel

- Food portion to which the MRL applies, and which is analysed:
  - Whole commodity.
  - Date, olive and similar fruits with hard seeds: whole commodity after removal of stalks and stones, but the residue is calculated and expressed on the whole fruit.
- This group is divided into the following subgroups:
  - Subgroup A: Assorted tropical and sub-tropical fruits - edible peel – small
  - Subgroup B: Assorted tropical and sub-tropical fruits - edible peel – medium to large
  - Subgroup C: Assorted tropical and sub-tropical fruits - edible peel – palms

3. Detailed classification:

| Code No.                                                                                     | Common name in Chinese | Common name in English                                                                       | Scientific name/Explanation                         |

#### XVI. Group of Assorted tropical and sub-tropical fruits - inedible peel

- Food portion to which the MRL applies, and which is analysed:
  - Whole fruit, unless otherwise specified: e.g., banana pulp.
  - Pineapples after removal of crowns.
  - Avocado, mango and similar fruits with hard seeds: whole commodity after removal of stones, but the residue is calculated and expressed on the whole fruit.
- This group is divided into the following subgroups:
  - Subgroup A: Assorted tropical and sub-tropical fruits - inedible peel – small
  - Subgroup B: Assorted tropical and sub-tropical fruits - inedible smooth peel – large
  - Subgroup C: Assorted tropical and sub-tropical fruits – inedible rough or hairy peel - large
  - Subgroup D: Assorted tropical and sub-tropical fruits - inedible peel - cactus
  - Subgroup E: Assorted tropical and sub-tropical fruits - inedible peel - vines
  - Subgroup F: Assorted tropical and sub-tropical fruits - inedible peel -palms
- Detailed classification:

### XVII. Group of Cereal grains

- Food portion to which the MRL applies, and which is analysed:
  - Whole commodity.
  - Wheat, rye, triticale, maize, sorghum, pearl millet and other similar cereals with husks readily separable from kernels during threshing: kernels. Barley, oat, rice and other similar cereals with husks that remain attached to kernels even after threshing: kernels with husks. (Note: only about 10% of traded rice is with husks.)
  - Corn-on-the-cob: kernels plus cobs without husks.
- This group is divided into the following subgroups:
  - Subgroup A: Wheat, similar grains, and pseudo-cereals without husks
  - Subgroup B: Barley, similar grains, and pseudocereals with husks
  - Subgroup C: Rice cereals
  - Subgroup D: Sorghum Grain and Millet
  - Subgroup E: Maize Cereals
  - Subgroup F: Sweet Corns
- Detailed classification:

| Code No. | Common name in Chinese | Common name in English | Scientific name/Explanation                                                                                                                                                                              |
